

# Homework3

Familiarization with the basics of the concept of class.

April 2021, Draghici Andreea, CR 2.1B

## 1 TASK:

Design and implement a representation class books in a library. For each book you must specify:

1. the title of the book;
2. the author;
3. publishing house;
4. ISBN number;
5. year of appearance;
6. the price.

The program will allow you to create a picture with books from a library and the possibility to search for books depending on: title, publisher, or ISBN. The functions of the class will be written so as to allow the mentioned operations above.
